

# Coolant Mixer

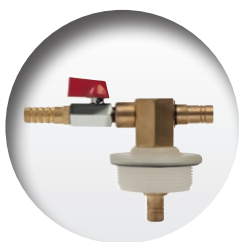

Standard model  
to fit onto 205  
litre drum

A measured performance every time with Filtermist coolant mixer.

Inaccurate mixing of coolants can lead to very expensive problems, so it pays to get it right!

#### Mixing Valve for 205 litre drum

Product Code: MV1000

#### Mixing Valve for 20/25 litre drum

Product Code: MV1025

#### Measured success

The Filtermist drum mounted coolant mixers accurately combine fluid concentrate with water in measured ratios, providing a ready to use solution straight from the drum.

#### Two robust models

The standard unit is supplied for 205 litre drums with an additional model, featuring a drum adaptor and short feed hose, supplied for 20 and 25 litre drums.

#### Easy to use and fully adjustable

The mixer valves are extremely easy to use, incorporating a semi-concealed metering screw for easy adjustment of mixing ratios.

#### Simple installation

Installation is a simple matter of connecting to a pressurised water supply, for which the unit comes complete with a water inlet attachment and outlet hose. Simply switching the water on and off then controls the mixer.

Dilution range: 0.5% -15%  
Max flow rate 30 litres/min.
