

# Five months into life at Filtermist for UK Sales Manager Salvatore

Salvatore Cannata joined Filtermist as UK Sales Manager at the end of September 2025 and is responsible for the sales function of both the Dust & Fume, and Oil Mist sales teams. He oversees sales strategy and key accounts and provides support to the wider sales team to ensure customers benefit from effective, COSHH compliant extraction systems.

P602 qualified Salvatore previously worked in the dust and fume extraction industry and he has extensive experience of building close working relationships with customers.

**I support our Area Sales Managers wherever necessary to deliver extraction solutions that are compliant, fit-for-purpose and value-led - ensuring every proposal remains commercially strong and aligned with customer needs.**

“We have a very knowledgeable and skilled team which is really important – especially when we’re working with customers that operate in highly-regulated and sometimes high-risk environments such as aerospace, defence, food and pharmaceuticals.

“We support our customers with solutions for welding fume, combustible dust, nuisance dust from sanding and grinding, and extraction needs around laser cutting and fabrication processes. In the food & beverage sector we work on challenges such as airborne dust from ingredients, allergen control, and hygiene-critical extraction. Together, we assess applications, develop compliant LEV solutions, and combine our technical and commercial strengths to support customers effectively.”

When not working, Salvatore loves exploring open roads on his motorbike and often goes for extended rides across Europe, which he enjoys immensely. Recent excursions include trips to France and Belgium. He also plays local club tennis, which helps him to stay active and competitive.

When asked what gets him out of bed in the morning Salvatore responded, “Working with great people, solving problems, and constantly learning something new.”

Looks like he’s landed the perfect role here at Filtermist!
